

Íslensk NýOrka 20 years - let's not make it another 20!

Jón Björn Skúlason
General Manager
Íslensk NýOrka

The start... 1999

RD&D

First achievement

Frequent comment - „ H_2 dont think so“

OEM's H₂ vision 2001

Promises... broken promises

Pioneering role

- First commercial H₂ station in the world
- H₂ buses and vehicles
- Multiple RD&D projects in electrofuels
- Education material
- First OEM EV's

Our fingerprints and spider role

- Government policy
 - first to excute tax incentives
- >15M€ in grants
 - for various Icelandic projects
- First marine el&H₂ deployment
- H₂ role out
- Dissemination - domestically and worldwide

First OEM EV

First iMiev outside of Japan

Frequent comment - „*no future in this*“

..also boats

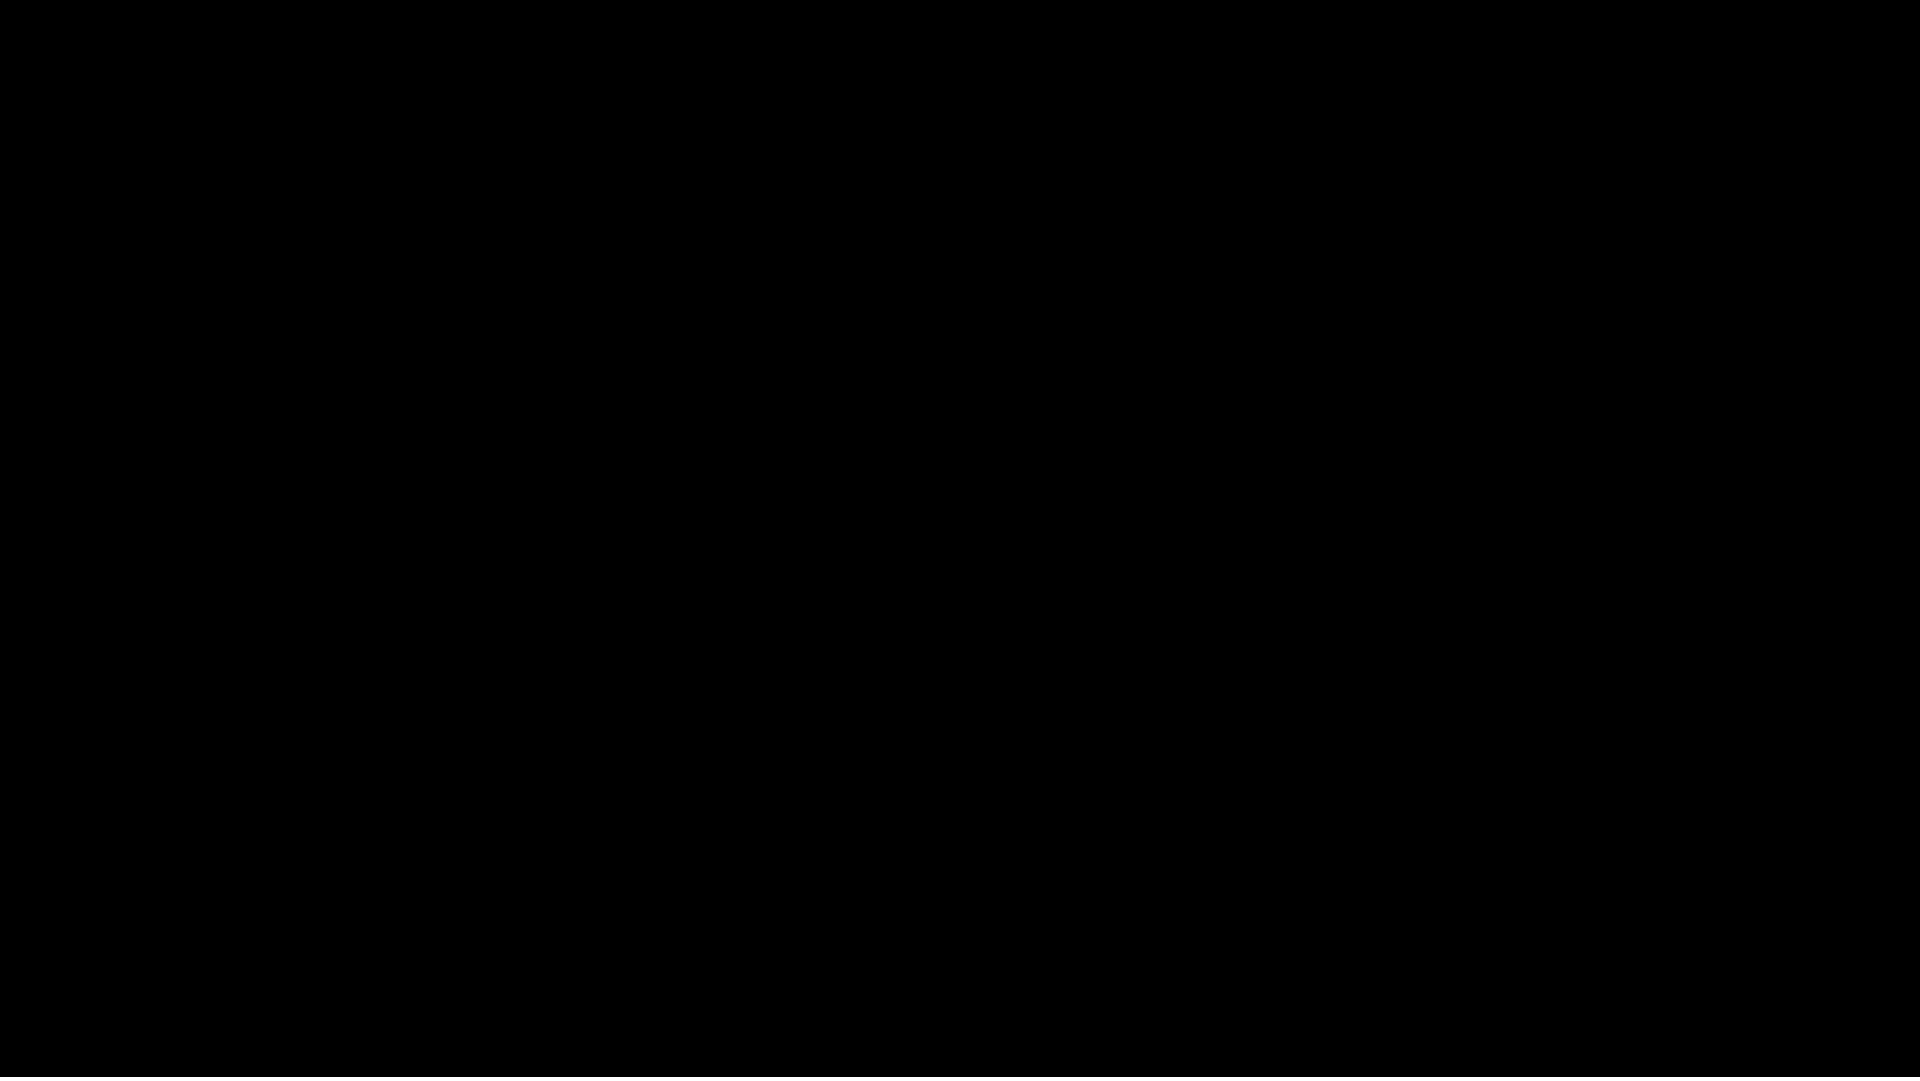

H₂ auxiliary system

First electric propulsion in Iceland

Frequent comment – „really are you stupid “

...and now H₂ again

Frequent comment – „again.... *how stupid are you*“

We dont know the future

INE does not care which fuel as long as it is eco-friendly

Electricity, methane, hydrogen, methanol, ammonia, etc.

„recently in
Iceland“

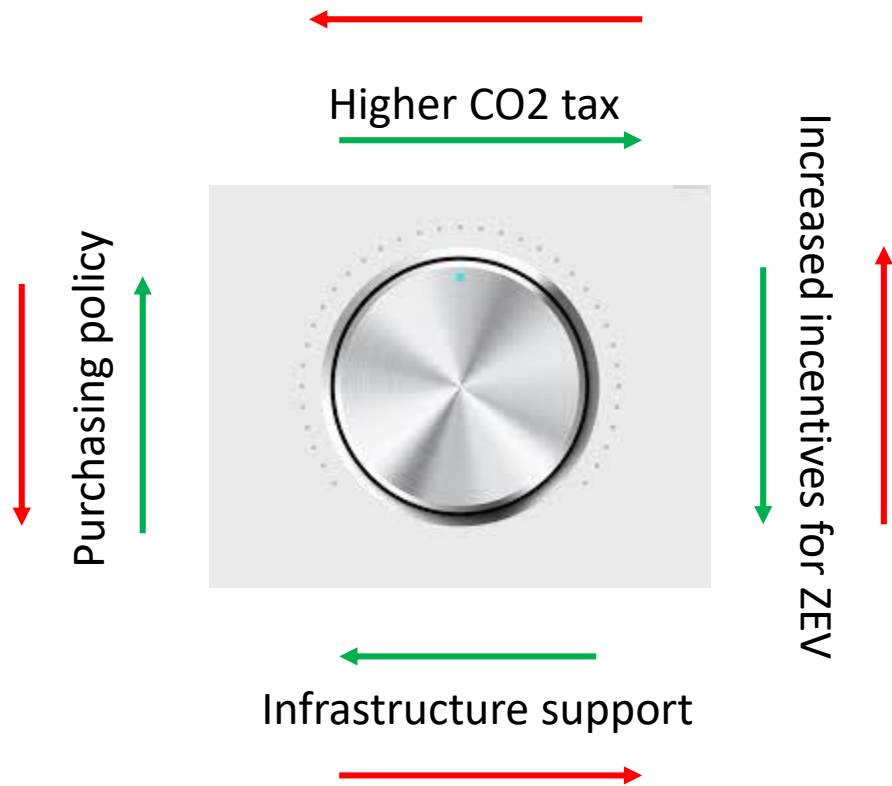

Our grandchildren, „*where you nuts!*“

Public-privat partnership

Great cooperation platform
Everyone working towards them same goal
Increased use of eco-friendly fuel

The „Gov nob“!!!!

✓ Vúha – 2040 no problem.....

✗ Paris Agreement gone!

INE's current policy/role

Eliminate the use of fossil fuels in Iceland

If successful

Then we are the only company in the world that
the owners will celebrate when the role is terminated!

For that the owners will be remembered in history
as have made a real change!

Let's not meet again in 2039

Please jointly - lets terminate INE's
current role before 2039

Lets act NOW
